

NOSHIN CHOWDHURY

Full Stack Software Engineer

📞 917-244-4637 ✉ noshin.chowdhury31@gmail.com 🌐 noshinc346.github.io/personal-website 📍 New York, NY

SUMMARY

Python-focused Full Stack Software Engineer with a background in **QA automation, backend integrations**, and **data-driven web applications**. Experienced in building tools that interact with APIs, handling **unstructured data**, and deploying performance-optimized backend systems. Skilled in **problem-solving across ambiguous systems**, and passionate about contributing to mission-driven fintech solutions. Based in NYC and open to hybrid collaboration.

PROFESSIONAL EXPERIENCE

Technical Specialist

Apple

🏢 Present 📍 New York, NY

- Troubleshoot and resolved **complex software and hardware issues**, collaborating cross-functionally with engineering teams to identify and relay edge-case bugs.
- Gained experience using internal **diagnostic tools and scripting**, reflecting a deep curiosity in **system behavior and technical workflows**.
- Provided insights into customer usage patterns and **advocated for feature improvements**, aligning user experience with product goals.

QA Automation Engineer

Blue Cross and Blue Shield

🏢 2022 - 2024 📍 New York, NY

- Developed and maintained **automated test scripts using Selenium and Java** to support the transition from manual to automated QA processes in the **claims adjudication system**.
- Validated complex user flows and backend logic by writing **data-driven test cases**, improving test coverage and catching edge-case issues earlier in the cycle.
- Used **Jira and Jenkins** to track defects, run regression suites, and integrate test automation into CI workflows.

Software Engineer Fellow

General Assembly

🏢 2024 📍 New York, NY

- Completed 500+ hours of hands-on, project-based training in full-stack development, gaining proficiency in front-end (React, JavaScript, CSS) and back-end (Node.js, Python, Express, PostgreSQL) technologies, while collaborating on team projects to design, develop, and deploy web applications.
- Led the development of **5 full-stack applications** using technologies like **React, Python, Django, Node.js, and RESTful APIs**, simulating real-world software team workflows.
- Wrote Python scripts to **clean, transform, and validate incoming data**, preparing it for seamless frontend use.

EDUCATION

Bachelor of Science

St. John's University

📍 Queens, NY

SKILLS

Front-end

JavaScript, HTML, CSS, React, Bootstrap, Semantic UI, Bulma, Adobe PS, Figma

Backend & Database Management

Python, Java, Node.js, Express.js, Django, RESTful Routing, JSON API, SQL, MongoDB, PostgreSQL

Version Control & Tools

Git, Maven, Jira, Jenkins, Selenium

PROJECTS

DuoQ

🌐 <https://github.com/noshinc346/duoq-frontend>

Full-stack Developer

Python, React, Django, PostgreSQL

- Built backend using **Django and PostgreSQL**, creating RESTful routes to support user profile data and matchmaking logic.
- Handled API data flow between frontend and backend, enabling real-time updates and smooth UX.
- Contributed to routing, database schema, and authentication logic on the Python backend.

Google AI Hackathon

🌐 <https://github.com/noshinc346/TouchStone>

AI & Front End Software Engineer & PM

Django, SQL, React

- Created interactive mobile app to facilitate Braille learning that aimed to solve the limited reach of Braille education.

HackSwift 2024 - Honorable Winner

🌐 <https://github.com/noshinc346/IOT-LLC>

Back End Developer & Front End Developer
MERN Stack

- Developed an innovative journaling app to provide a personalized experience resulting in a new trend in journaling and attracting a growing user base.

CERTIFICATION

Full-Stack Software Engineering

General Assembly

Machine Model Learning
